

PHASE 2

Backend Development & Configuration

1. Objective

Configure the ServiceNow backend components required for the Laptop Request application, including Update Set, Custom Application, Table, Approval Relationship and Record Producer.

2. Update Set Creation

1. Open All > System Update Sets > Local Update Sets.
2. Click New.
3. Name the update set HR Onboarding Application.
4. Set State to In Progress.
5. Enter Release Date and Short Description as required.
6. Submit and make the update set Current before development.

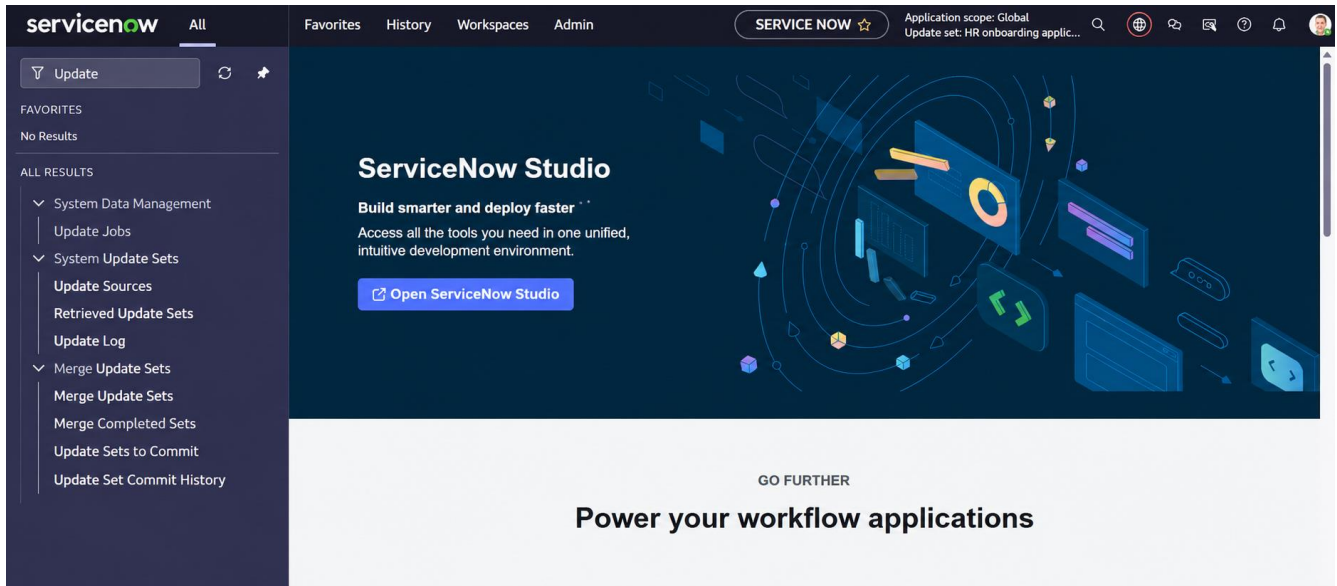

The screenshot shows the 'Update Set' configuration page in ServiceNow. The title bar indicates 'Update Set' and 'HR onboarding application'. The form contains the following fields:

- Name:** HR onboarding application
- State:** In progress (dropdown menu)
- Parent:** (empty field with a search icon)
- Reference date:** 20/08/2025 09:00:51 AM (calendar icon)
- Install date:** (empty field)
- Installed from:** (empty field)
- Description:** (empty text area)
- Application:** Global (dropdown menu)
- Created:** 27/08/2025 09:05:17 AM
- Created by:** admin
- Merged to:** (empty field)

At the bottom left, there is an 'Update' button and a 'Related Links' section with the following links:

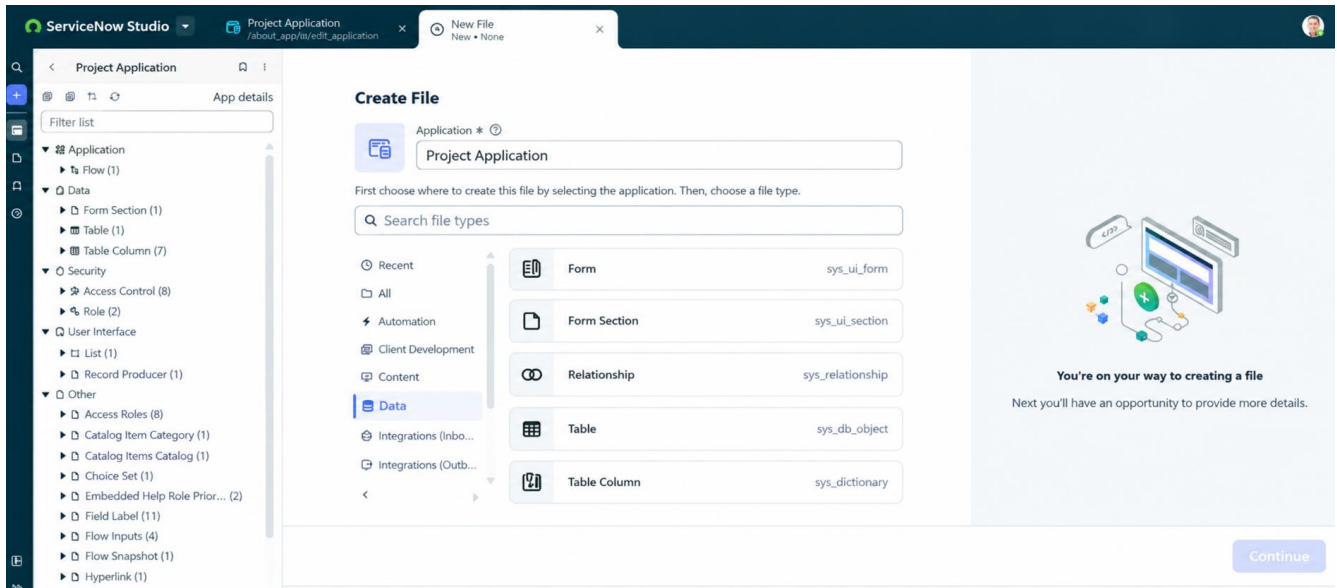

- [New With Another Update Set](#)
- [Scan Update Set](#)
- [\(SN Utils\) Versions \(0\)](#)

ServiceNow – Employee Laptop Request Management System

3. Custom Application Creation

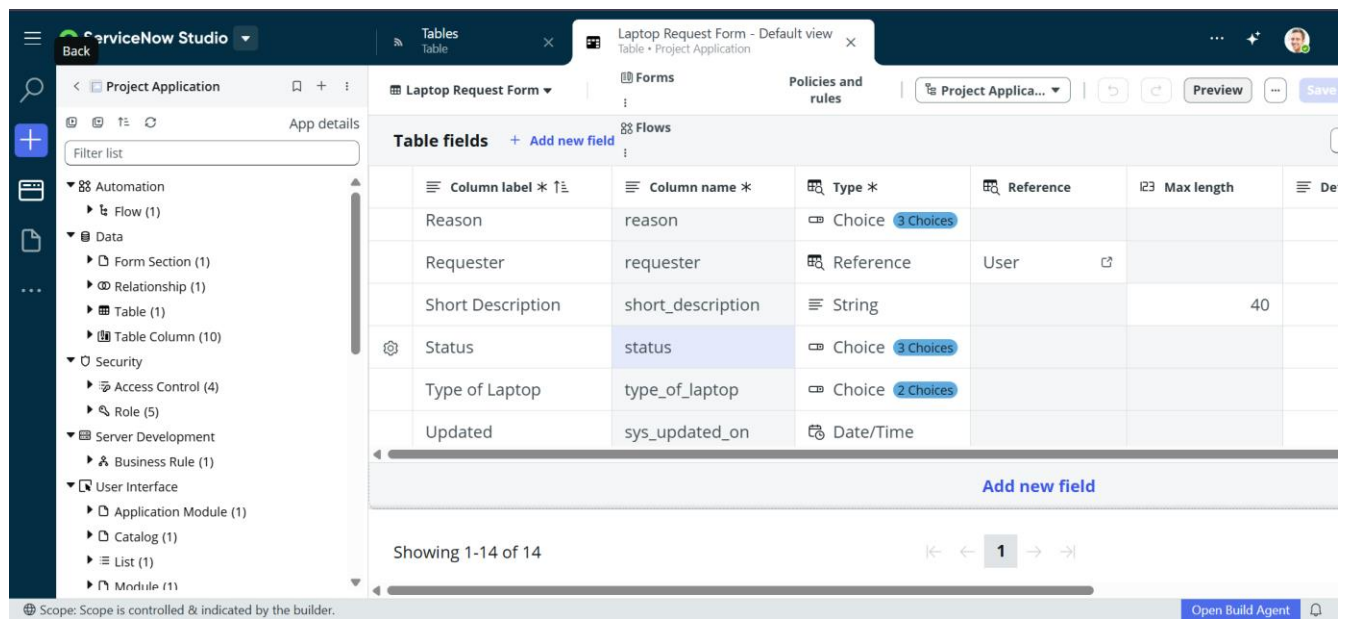

7. Open All > ServiceNow Studio.
8. Create a new application.
9. Application Name: Project Application.
10. Select a scoped application.
11. Continue and create application artifacts within the scope.

4. Laptop Request Form Table

Create the custom Laptop Request Form table and configure the required reference, choice, date/time, string and auto-number fields.

Configuration	Value
Table	Laptop Request Form
Requester	Reference to User
Manager	Reference to User
Request Type	Basic / Advance
Status	Pending Approval / Approved / Rejected
Reason	Software Development / Personal Use / Other

5. Approval Table Relationship

The Laptop Request Form is related to sysapproval_approver so that manager approval records can be associated with the request.

12. Navigate to Relationship configuration and click New.
13. Name: Laptop Request.
14. Applies to: Laptop Request Form.
15. Queries from: Approval table / sysapproval_approver.
16. Open Laptop Request Form configuration and add the relationship.
17. Verify the approval records appear as a related list.

Relationship - laptop request

Name:

Application:

Advanced: ☐

Simple reference: ☐

Applies to table:

Queries from table:

This script refines the query in current that will populate the related list. For more information about it, its parameters and control variables, see [the documentation](#). See also the article about the recommended form of the script.

Query with Turn on ECMAScript 2021 (ES12) mode

```

1 (function refineQuery(current, parent) {
2
3     // Add your code here, such as current.addQuery(field, value)
4     current.addQuery('source_table', parent.getTableName());
5     current.addQuery('document_id', parent.sys_id);
6
7 })(current, parent);

```

6. Record Producer Configuration

18. Navigate to Service Catalog > Catalog Definitions > Record Producers.
19. Click New.
20. Name: Laptop Request.
21. Target Table: Laptop Request Form (u_laptop_request_form).
22. Add variables matching the required table fields.
23. Map each variable to the corresponding target field.
24. Create/associate Employee Service Catalog and category Service.
25. Save and test the Record Producer.

Configuration	Value
Record Producer	Laptop Request
Target Table	Laptop Request Form
Catalog	Employee Service Catalog
